

## ScanShark Getting Started

Insert the Financial-Inventory CD-ROM, it should open automatically. If it does not open automatically, click START, RUN, then type (without quotes) “D:\install.exe” where D: is your CD-ROM drive.

You will see this screen:

There are six separate program installations on the installation CD-ROM. In all cases, use the default installation settings.

**Financial-Inventory Processing:** This is the database application that takes your collected data and then generates various reports, archives your data and so on. *Recommended.*

**Alpha-5 Runtime:** This is the database that runs the Financial-Inventory Processing application. *Recommended.*

**Alpha-5 Upgrade:** This ensures that the latest version of Alpha-5 Runtime is installed on your PC. *Recommended.* Install the “Alpha-5 Runtime” first.

**Windows 98:** Windows 98 users may need some additional files on your computer to run the Alpha-5 runtime environment properly. This installs the necessary files. Later versions of Windows will not require these files. *Optional.*

**Windows 98 Shortcut:** Installs the shortcut to the Financial-Inventory Processing program. Use for Windows-98 PC's. *Recommended for Win-98 computers.*

**Windows XP Shortcut:** Installs the shortcut to the Financial-Inventory Processing program. Use for Windows-XP PC's. *Recommended for Win-XP computers.*

If using a different version of Windows, try the Windows-XP shortcut.

Click **Exit** to close the installation screen.

For additional copies of the various Financial-Inventory and related manuals, click START, RUN, and type (without the quotation marks) “D:\documentation” (Where D: is your CD-ROM drive), then click OK. The latest documentation for these programs will be listed, double-click the documentation file to open.
